Summary — Focused on building things that actually work — from automating startup outreach workflows that cut research time from 20 minutes to under 3 minutes, to building “DocuMind”, an AI-powered document intelligence platform that turns unstructured PDFs into searchable insights, summaries, structured data, and conversational AI responses in seconds. Comfortable across Python, SQL, backend APIs, and AI integrations, with internship experience at IIT Kanpur.

Education

SRM IST-Kattankulathur

Expected 2026

B.Tech · Electronics and Communication Engineering - Data Science

Delhi Public School, Eldeco

May 2022

Class XII - CBSE · DPS Eldeco, Lucknow

Experience

IIT Kanpur

Dec 2024 - Jan 2025

Virtual Intern

- Contributed to the development of a Flutter-based cross-platform application, implementing data-driven features and backend integrations in an agile team environment.
- Integrated 3 REST APIs for real-time data fetching, enabling reliable frontend-backend communication across cart, auth, and product modules.
- Implemented 4+ features with data-driven logic, resolved response latency and data consistency bugs resulting in faster load times and reduced crash rate.

Projects

DocuMind

Jan 2026 - Mar 2026

Tech Stack: Python, Gradio, Flask, Groq API, OCR, Google Sheets API

- Built “DocuMind”, an AI-powered document intelligence platform with OCR, semantic classification, summarization, and conversational PDF Q&A.
- Developed an adaptive document processing pipeline supporting PDFs, images, DOCX, and TXT files with structured data extraction and action-item detection.
- Integrated Groq LLMs, Google Sheets API, email automation, and a modern Gradio UI for intelligent document analysis and workflow automation.

PitchPilot

Nov 2025 - Dec 2025

Tech Stack: Python, Groq API (Llama 3.3), Google Sheets API, Gmail SMTP, BeautifulSoup, Google News RSS

- Built an end-to-end cold email pipeline that auto-researches companies via web scraping + Google News RSS, cutting research time from 20 mins to under 3 mins.
- Engineered a multi-profile system with 3 role-specific personas, enabling the LLM to auto-select the most relevant project angle per target company’s industry.
- Implemented a human-in-the-loop approval gate via Google Sheets before automated Gmail dispatch, ensuring quality control at scale with full CSV logging for outreach tracking.

Skills

Programming Languages Python, SQL, Dart

AI & Automation Prompt Engineering, LLM Integration (Groq), AI Workflow Design

Tools & Technologies Git, Github, Vercel, Groq API, Jupyter Notebook

Certifications

Advanced MySQL Data Analysis
